- Braced frame (68010-AK)
- Counterweight 25 kg (68010-B)
- Safety devices (68010-RS)

## ROOF SAFETY ON FLAT ROOFS

Our newly developed roof safety system for flat roofs (GS-approved since October 2005 and type approved by the Norwegian Labor Inspection Authority since April 2006) gives you an easy and almost tool-free assembly.

Pillars are delivered both with wedge grips and tilt bolts, which makes it possible to combine the system with the double railings that are standard for scaffolding systems.

By stiffening the frame, the pillars can be tilted, so that one is free to do roof work without obstacles where the pillars are located.

Edge pillars are equipped with 6 wedge grips so that the edges of the railing can also be quickly assembled, and one avoid the time-consuming task of fastening the couplings.

With this system, you can ensure a flat roof that is both cost-effective and time-saving.

Each element is marked according to the current regulations. The system is delivered with an assembly- and user manual.

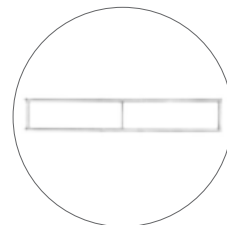

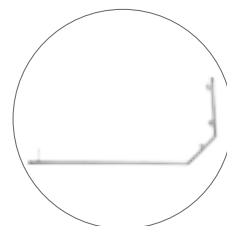

## OFFER NOT BINDING

Contact us for unbinding specified offers

## FACADE SCAFFOLDS

INSTANT Blitz-Fix roof safety is essentially a product extension of our facade scaffolding system INSTANT Blitz-Fix facade scaffolds.

Customers that have previously bought our facade scaffolds will therefore recognize many of the same elements. Double railings in aluminum are the same that are used in the facade scaffolds. Side railings from a number of other brands can also be used.
